**SUMMARY:**
Versatile Web Developer with proficiency in front-end and back-end technologies, delivering impactful solutions for seamless user experiences.

**EXPERIENCE:**
**Software Engineer** - Kylo Apps (Kylo Technologies) | August, 2022 - Present
- **GlobalDBi[Link]**: It is a SAAS Product which consists of a B2B database.
  - Developed using React.js, Material UI etc.
  - Developed the authentication module using JWT Token.
  - Created a dynamic component to show data using "antd" package and implemented the feature that enables users to export the B2B data table using "xlsx".
  - Used "Million Verifier" apis to verify the email of businesses.
  - Developed a module that generates wallet credits using Stripe Payment Gateway which enables users to download the B2B data.
  - Developed another SAAS products similar to GlobalDBi called HealthDBi
- **Viosa[Link]**: Developed "Viosa," an educational marketplace for courses.
  - Integrated OpenAI for AI-powered resume creation using the Kendo PDF library.
  - Specialized product "Interview Pro" for interview practice and assignments.
  - Leveraged Redux for efficient state management in the applications.
  - Implemented Razorpay Payment Gateway for seamless and secure course purchases.
  - Utilized AI Credits as a unique payment option for the resume creation service.
- **Vyap App[Android]**: Developed and deployed a robust B2B ecommerce application using React Native.
  - Integrated Rupifi for efficient monthly payment tracking and management within the app.
  - Implemented Cashfree Payment Gateway SDK for secure and seamless payment transactions.
  - Utilized Mixpanel for detailed user event tracking, enhancing analytics for informed decision-making.
  - Integrated Smartlook Analytics to gain insights into user interactions and behaviors within the application.
  - Incorporated Lottie for engaging animations, enhancing the user experience and visual appeal.
  - Integrated firebase push notifications, firebase storage, firebase crashlytics.

**TECHNICAL SKILLS:**
- **Frontend** - ReactJS, NextJS, Redux, React Native, Typescript , Javascript and HTML/CSS.
- **Backend** - Node.js, Express.js, MongoDB.
- **Testing** - Sonarqube.

**PERSONAL PROJECTS:**
**With GPT Prompt[Link][Code]**: Frontend and Backend Development
**Tech Stack:** Next js, Next Auth, MongoDB
- Front End development using Nextjs for creative interactive, intuitive and responsive user interface.
- Backend implementation built using Nextjs to handle api creation and api integration.
- User Authentication using Google OAuth and authorization using Next Auth.
- Available prompt, top prompt etc.

**EDUCATION:**
**Kunwar Satyavira College of Engineering and Management,** Bijnor | Bachelor of Technology in CSE | Jul 2018 - Jul 2022.
**Modern Era Public School,** Bijnor | Class 10, Class 12 | April 2015 - April 2016, April 2017 - April 2018 (PCM).
